About

A Passionate Software Engineer From India

Proficient in front-end and back-end technologies.

Projects

E-Commerce: Link

- The development of an e-commerce platform with functionalities similar to **Amazon**.
- A **E Commerce project** is deployed in a production setting on a cloud platform like **AWS , Vercel, or Netlify.**
- Implemented robust user authentication system using technologies such as **JWT (JSON Web Tokens) and OAuth** , ensuring secure access to user accounts and personal information. Tech used **React js , tailwind , firebase , razorpay.**
- Integrated payment gateway solutions, including Razorpay and secure online transactions for customers.
- Implemented advanced features such as **sorting ,filteration, searching, wishlist, reviews, ratings, more**.
- Designed and implemented a responsive and user-friendly interface, ensuring user experience **across various devices and phone screen size specially**.

Twitter Clone: Link

- Developed a Twitter clone application using the MERN (**MongoDB, Express.js, React.js, Node.js**) stack, showcasing proficiency in full-stack web development.
- Integrated MongoDB as the database solution for storing user **data, profile, posts, tweets** and more interactions.
- **RESTful API** services using **Node.js and Express.js** to handle data interactions between the frontend and MongoDB database
- Utilized **JWT** authentication using MongoDB for secure **user authentication** and **real-time updates**.

Gmail Clone: Link

- A **Gmail project** is deployed in a production setting on a cloud platform like **Vercel , Netlify.**
- In this Project , Tech used **React js , tailwind , Firebase.**
- Implemented user **authentication and authorization systems** to secure user accounts and sensitive information.
- Integrated email management features such as **inbox, sending, compose messages, labeling, searching and filtering** providing users with efficient tools to manage their emails effectively.
- Designed and implemented a **responsive** and usability across **various devices and phone screen size specially**.

Technical Skills

Languages: JavaScript
Backend: Node.js, Express.js
Frontend: React, TailwindCSS, HTML, CSS, Bootstrap
Databases: Firebase, MongoDB
Web Technologies: Socket.IO
Developer Tools: Postman, VS Code, GitHub

Education

BEU University , Patna   **2019 - 2023**
B.Tech in Mechanical Engineering   *7.4/10 CGPA*
